Microscop EduLed FLArQ mono

The BMS EduLed microscope is a high quality, robust and well equipped microscope ideal for school and study purposes. Rechargeable batteries enable the BMS EduLed to function also as a portable field microscope (batteries not included).

The transmitted light illumination of BMS EduLed FLArQ is performed by a LED with dimmer (for continuous variation of light intensity) and a height-adjustable Abbe condenser with iris diaphragm. This allows the instrument to not only work with the common 4x, 10x and 40x objectives but also use 100x oil immersion objectives (optional). The objectives are DIN achromatic Semi Plan objectives. With the 10x wide field eyepiece you obtain a total magnification range of 40x-400x (optional 600x and/or 1000x). The optical system provides sharp, clear and true-colour images with high-contrast. The microscope has a 360° rotatable monocular viewing head, coaxial coarse and fine focusing drive and a mechanical stage with ergonomically arranged coaxial controls for easy handling.

All parts are locked to the microscope. The microscope has anti-bacterial paint on the metal parts and fungicidal coating on the optical (glass) parts.

Eyepiece: extra large WF10x/18mm with pointer, locked

Head: monocular, 360° rotatable

Tube: 45° inclined

Nosepiece: quadruple revolving nosepiece with click stops and reversed mounted

Objectives: achromatic, semi plan 4x/0.10, 10x/0.25 and 40x/0.65 (spring loaded)

Focussing mechanism: dual coaxial coarse and fine focus controls

Stage: metal plan built-in mechanical stage, 110 x 120mm, with ergonomic arranged coaxial controls

Stage limit stop: preset and adjustable

Condenser: rack and pinion Abbe condenser N.A. 1.25 with iris diaphragm, adjustable in height

Illumination: new generation High Power LED 0.5 W. Light intensity steplessly adjustable through rotary potentiometer, lifespan LED: approx. 50.000 hours

Magnification: 40x, 100x and 400x. Optionally extendable up to 1000x

Integrated handle for easy transport

Power: 100~230V/50Hz

Double electrical safety: full separation from the main power through DPDT* switch.

Multi power use: yes (main power cable, rechargeable batteries, non rechargeable batteries)

Cordless use: 3 hours charging time and 10 hours cordless working time

Detachable IEC power cord: C13 connector (connecting to the microscope) to Schuko

Anti-bacterial paint: yes

Anti-fungus optics: yes

Length x Width x Height: 175 mm x 133 mm x 358mm

Weight: 3,5kg

LEYBOLD®

Équipement pour l'enseignement expérimental, scientifique et technique
